What you are doing these days

FC1

Abolfazl Madani

"Hi, I'm here to talk about what I'm doing these days. First, when I get home, I do my homework and then I study. If it's Sunday, Tuesday, or Thursday, I go to basketball practice from 6:30 to 8:00 PM. When I come back in the evening, I'm really tired, but I go to the bathroom and finally sleep at 10:30

MohammadMahdi Madani

These days I'm going to school and doing my homeworks and in my free times I play videogame and spend time with my family and friends. I'm on a diet and I do workout and I've lost seven kilograms. I help my mother in cleaning and making food. I eat popcorn when I watch football matches and series. These days my father gave a duty to buy groceries and on weekends I go to work with him.

Amir Mahdi Mousavi Panah

I wake up every morning. There are several ways to wake up in the morning. Either I go to school, which I wake up at 6:30. Or my classes are virtual, which I wake up at 8. Or I'm on vacation, which doesn't have a specific time these days.

After I wake up, I buy breakfast, go to school, and return home at 3:45. Then I either start writing homework or come and eat fruit.

Then I go to sleep and wake up around 6pm to either do my homework or if I do, I go and play.

If I haven't done my homework, I go and do it until 8-9pm.

Then I have dinner around 9-10pm and then I watch a movie or TV series.

Then I go to sleep around 10:30-11pm until I wake up again in the morning.

**BIOGRAPHY OF A
FAMOUS
PERSON**

Mehrab AliMohammadi

Amir Kabir worked hard to improve the country. He focused on education and built new schools. He also aimed to reform the economy and politics. His goal was to reduce corruption and make the government better. He wanted to help the people and make their lives easier.

One of his important achievements was to establish the Dar al-Funun, which was the first modern university in Iran.

However, Amir Kabir faced many challenges and opposition. Some people did not like his reforms. They thought he was too strict. Unfortunately, his enemies plotted against him. In 1852, Amir Kabir was killed by his enemies. His death was a big loss for Iran.

Today, Amir Kabir is remembered as a national hero and a reformer. His ideas and efforts are still important in the history of Iran.

MohammadHosein Hakkakian

Name: Elon Reeve Musk

Birth: June 28, 1971

Nationality: American, Canadian, South African

Job: Entrepreneur, Engineer, Inventor

Known for:

Founder of SpaceX, Tesla, Neuralink and the boring company

Owner of Twitter(X)

Achievements:

Sold startup Zip2 and PayPal

Launched the first private rocket to space with SpaceX

Revolutionized electric vehicles with Tesla

Developing brain-computer interfaces with Neuralink

Famous sentence:

"If something is important enough, even if the odds are against you, you should still do it."

Robin Mirzaie Nikoo

The name of the celebrity is Cristiano Ronaldo. In my opinion and many of Ronaldo's football experts have been the best footballer in the world. He started his career at Sporting Lisbon and with his good performance, he was able to attract Manchester United and joined Ronaldo. Ronaldo joined Real Madrid after six seasons in Manchester United. Most footballers remember Ronaldo's friends in Real because he spent the peak of football at that time. He received a lot of honors with Real Madrid, for example, won the Champions League four times. He still won two gold balls. Then Ronaldo joined Juventus in year 2 and played for four years. He returned to Manchester United again, but he was not good, and after two seasons, he joined the team with the offer of Gran al -Nasr and is currently playing there.

FOR A *Greener* FUTURE

FUTURE GOALS

FC3

Amir Parsa Kebriaie

Now I'm studying in a good school. I like to discover my talents to be successful. I want to progress my self-knowledge. Be cause I think with high self-knowledge you can continue your goals better. One of my goals is being a person that can help my people. People that are poor and they are depressed. Now I think I love chemistry. So I think I will pick science, but I think need more time to make my last decision. In fact I'm at eighth grade. I think I will have a big pharmacy in the future but I don't know, we will see. I want to have a revenue that is good and a lot. Be cause I will have a good family so I need this to control my family.

I forgot to say that in the future I will buy a very good computer to play games and work with.

Mohammad Parsa Mohammadi

Hello, I am Mohammad Parsa Mohammadi, a 14 year old student from Tehran. Like other students and my friends, I have many goals for myself. Being a student is a bridge for me to reach my goals in the future. My short term goal is to succeed in my school exams. That I can reach my midterm goal, that is, a good rank in the Konkor national exam. But the question is, what is the purpose of all my efforts for a good rank in the Konkor exam ?

I plan to become a doctor in the future. In Iran, the main condition for becoming a doctor is a good rank in the Konkor exam. In my opinion, the medical profession is the best profession in Iran. Every person's goal in life is to succeed . and when I become a doctor, it means I have succeeded.

Mohammad Parsa Maleki

1. I'm going to study at good university. I try and try to study in university.
2. I would like to become a doctor after university.
3. I'm planing to work and work to get money.
4. I'm planing to buy car. I like BMW.
5. I want to get married when I got rich.
6. I'm going to travel with my wife.
7. I'm would like to go paris and Italy and France and see the world.
8. I want to have a baby. one girl and one boy
9. I would like to teach my kids the lifestyle of my grandfather.
10. I would like to keep my family.

AmirMohamad Heidari

The future is very scary and never predictable. I used to be very interested in architecture and wanted to become an architect in the future, but now everything is different. I don't know exactly what is going to happen and of course I am afraid of it.

I often like to do things for others that I could not do for myself, for example mental health. I want to be so rich that I can help every poor person I come across.

I hate to describe myself, but I am a forgiving person.

And finally:

AmirHosein Bayat

Hello!

I am talking about what am I doing these days.

In these days, I am doing my homework and reading my textbooks for the exam tomorrow.

Then I am helping my mother

I am doing exercise.

I am learning a soccer game In these days.

I am creating a science group . I am play ping pong and hand football.

I am trying to speak English In the home .

And I am playing the video game In these days.

Thank you for reading .

Good bye.'

Ilia Barkhah

I came today to talk to you about my future goals

First of all I would like to go to college to study mathematics and then to study computer science and learn programming. And I would like to make a lot of money through programming and buy a nice house and car.

I want to marry a beautiful woman who is kind and caring. My wife and I want to live a happy life .If God wills, we will have four children, two boys and two girls

I want to see my children grow up and get married, and then retire and be a good grandfather

Mohammad Mahdi Hasanpour

My goals for the future:

Go to university well

Having a good job

Buying a dream car

Having a very nice house

And buying the villa I wanted

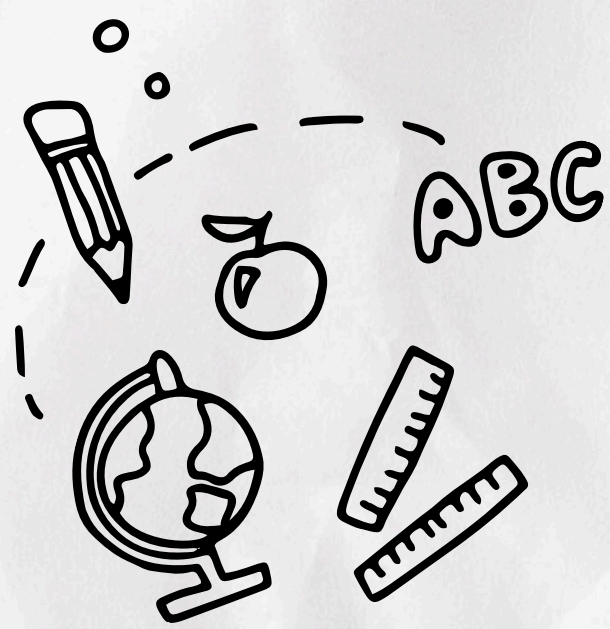

get a wife

having a baby

travel the world

And after 60 years old I'll relax and

be there hat

SCHOOL SUBJECTS

FC4

Sajjad Panahian

Recently, in subject of science, we moved from the topic of geology to the topic of biology and we saw a new world that is completely different with the previous one. Any person that sees the world of biology would get surprised and a bit confused because it's all made by amazement and makes us think about the creation of livings in the world.

The most recent thing I've learned was about plants. We learned that there are five types of livings and plants are fourth group of them. Each next group's creation is happened by changes that the previous group has had in the gene and some other rare actions that happened to them. So, we can say plants are younger than other groups except of humans.

The thing that is interesting is that all of plants are not like each other. For example, first type of plants has grown and got changed and other types of plants were born by these events. We understood that we have some groups of livings and plants are one of them. Now as we saw, plants also have some types and groups in themselves and that is what is interesting.

In conclusion, we saw that how interesting could biology be and heard a little about plants. I also suggest you to follow this topic and learn about livings. See you later.

AmirSam Saadi

Math is one of my favorite subjects. I am talented in this subject and my grades are usually good. I don't get bored in math class and I enjoy this subject.

Different parts of mathematics

Geometry

Calculus

Statistics and Probability

etc.

Geometry :

Geometry is a part of mathematics that deals only with shapes and lines, such as thallus, angles, etc.

Calculus :

Arithmetic is a part of mathematics that deals only with formulas, numbers, and calculators.

Statistics and probability :

Statistics and probability are the part of mathematics that deals only with graphs and various graphs such as a line and broken circle which are for comparison

Hami Karbalaie

In my opinion, the language of every country is a sign of the authenticity and beauty of that country, and the Persian language is a very old -fashioned language that I personally proud of in our original language there are many poets, some very old and some are contemporary. Today, people in our country are very interested in our country's poets and our country. Mr. Cheshami has made us learn this topic excellent, and on the other hand, Master has been from the seventh class and has taught us great since that year.

Taha Ghaznavi

Science is one of the most difficult subjects in school. There are four subjects in this book, namely biology, geology, physics and chemistry. Biology is a subject related to the human body and living things, and those who want to become doctors should become good biologists. In the physics lesson, we mostly work with mathematics and calculations. Those who want to become engineers, architects, etc. should read this course. In the chemistry lesson, we work with substances, atoms, molecules, etc. Those who want to work in the laboratory and are interested in the structure of materials should read this course well. In the geology course, the structure of the earth and its types, the type of soil, etc. are mentioned. This course is good for those who want to be geologists, archaeologists, and those who work a lot with fossils. Those who want to learn the experimental science course should be interested in reading a lot and have a good memory like the history course.

Sadra Golestani

One of the lessons I recently learned is about math and arithmetic.

About dividing algebraic expressions. In general, math is one of the few lessons that I like and the new lesson I learned was also sweet for me and I am very happy that I understood it well and I am ready to do the exercises and exams. Many of my classmates hate math and especially algebra, but I am interested in algebra and think I am weird.

This lesson is about dividing algebraic expressions, where an algebraic expression is arranged and divided by another arranged algebraic expression. This discussion is a bit long and complicated, but besides these, it is very enjoyable when I get the answer. In this lesson, there is a high probability of making mistakes. Also, in this lesson, there is a method to prove and test the correctness of the answer, and after doing this method and proving the correctness of the solution, I breathe a sigh of relief.

Overall, this lesson was very good and I am happy that I was not absent when the teacher taught this lesson.
