**J. Read the passages and answer the questions.**

It's hard to make friends if you stay home alone all the time. You need to get out of the house and do things that will help you meet other people. Join a club, play a sport, do volunteer work. You'll find that it's easier to make friends with people who have similar interests.

Learn from people at school or work who seem to make friends easily. Observe their behavior. How do they make other people feel comfortable? Notice what they say and how they act. Don't copy everything they do, but try some of their techniques. It will help you develop your own social style.

Think of some topics that would make good conversation. Find out the latest news, listen to the most popular types of music, or watch an interesting movie or TV show. The more you have to say, the more people will want to talk with you.

Be a good listener, and let people talk about themselves. Don't try to dominate the conversation with "me, me, me." Ask lots of questions. Show an interest in the answers. This will make people feel special, and they will want to be your friend.

When you start to get to know someone, don't be friendly and talkative one day and too shy to have a conversation the next day. Be consistent. Consistency is a quality that people look for in friends.

Have confidence in yourself. Don't be self-critical all the time. It's hard to get other people to

like you if you don't like yourself. Think of your good qualities and all the reasons people would want your friendship.

Pursue the friendships you really want, with people that you like, respect, and admire.

Try to meet a lot of people, too. That way, you'll have a bigger group to choose from and a better chance to make friends.

Lions rival tigers for the title of the biggest cat. In fact, lions and tigers are so similar in their physical features that without their distinctively colored fur, soft hair that covers the bodies of some animals, even

scientists have trouble telling them apart. Male lions weigh between 150 to 250 kg and stand about 123 cm tall at the shoulder. They measure up to 90 cm in length, not including the tail, which measures an additional 90 to 105 cm. Female lions are smaller, weighing between 120 and 180 kg. They stand about 107 cm tall and measure less than 175 cm in length, with a slightly shorter tail.

Adult lions have fur that varies in color from light brown to reddish brown. The fur of the tail is darker. Only male lions grow a mane, the long hair around the shoulders, which grows darker and fuller as the animal ages. Cubs are born with thickly spotted fur, which helps them hide from dangerous animals. The spots gradually lose color as cubs grow up, sometimes remaining on the legs and belly until the lion grows fully.
